P4/5 Newsletter

June 2017

It's hard to believe we are almost at the end of P4/5. During this last term we've had fun learning. Read about some of our experiences and memories

We've been learning about the Sustainability Goals that we thought were linked to health e.g. 1.No Poverty 2. Zero Hunger 3. Good health and Wellbeing. Although we have enjoyed researching them it has made us realise how many people really need the Goals to make their lives better.

By Nathan and Paula

In science we did some experiments to test which things floated or sank. We observed what happened and recorded the results. We then designed and made rafts in trios and tested them with a cargo. We predicted whether they would or wouldn't float in water. Most of the rafts passed the test and floated!

It's been a great pleasure to see the class develop both their skills and confidence in P4/5.

Ms Burns and Mr Palmer

We enjoyed picking our favourite pieces of art because we got to see the different art we had done over the year. We were able to see how we had improved. Our favourite pieces are now displayed in the classroom as part of our Art Exhibition.

“It has been a very exciting year in P4/5. I am really going to miss this class”.

“This has been a very eventful year. I’ve learnt lots of new things. I’ve really enjoyed P4/5”.

“I have made new friends this year - not just with the P5s, but also with the P4s”.

“I have had a really good experience and Ms. Burns and Mr. Palmer have been AMAZING teachers”.

We all had fun doing our assembly and we think we did a really good job. We loved learning about the Global Goals and Goal 4 was the focus for our scripts and poems. Lots of people came and everybody got our message: ‘Education for All’.
